WEI ZHANG
Professor of Management Information Systems

Hometown: Anhui, China

CM Department: Management Science & Information Systems

First in my family to go to College/University.

Undergraduate courses taught: MSIS 110 Introduction to Computer Information Systems, MSIS 230 Relational Databases

What drew you to and keeps you at UMass Boston? Our students, they are aspiring, hardworking, persistent, and diverse. And Boston, the hub city with a vibrant innovation-based economy.

Favorite student story: Two students of mine took separate classes from me, but somehow they met each other and found out they both had me as their professor. Later they got married! I think it is because they both enjoyed my classes!
