

FINANCE CONCENTRATION

OVERVIEW

The finance concentration offers courses in corporate finance, investment and portfolio management, financial institutions and markets, and financial policy. The curriculum has been carefully designed to reflect the essential knowledge and skills necessary for success in the lucrative and challenging field of finance. All Management majors are required to complete at least one concentration; the Finance concentration is one of nine current options.

CAREER PATH

Graduates of the program have begun careers as financial analysts, controllers, investment bankers, portfolio managers, brokers, loan officers, and insurance adjusters. Our alumni work in the investment, banking, mutual fund, high tech, and biotechnology industries as well as in government and non-profit organizations.

"I chose to study Finance because I was already pursuing Finance in my personal time and I desired to supplement my knowledge base. Since starting my studies, I've realized that Finance is always changing and there is always more to learn. I've enjoyed the variance of content difficulty and depth between the different instructors and courses.

Kirill Didychouk, Class of 2022
